## **Survey available for solar pavement lighting project at U.S. 169 interchanges**

The Kansas Department of Transportation (KDOT) and Pittsburg State University (PSU) have developed a survey to obtain input from the traveling public regarding the self-sufficient solar powered LED pavement lights at the U.S. 169/Plummer Road and U.S. 169/Chanute-Humboldt Road (old 169) interchanges.

The solar lights were installed at the interchanges in the autumn of 2013. The solar lighting pilot project is a joint endeavor of KDOT and PSU – School of Construction. KDOT staff cored the holes and placed the lights at the interchanges, with PSU – School of Construction providing the installation expertise.

The solar light survey can be accessed at the following link: <https://www.surveymonkey.com/s/27NVP3P>. Those with questions may contact KDOT project engineer Chris Pross at KDOT-Pittsburg, (620) 231-7560, or Priscilla Petersen at KDOT-Chanute, (620) 431-1000.
