

APPENDIX

to the

KANSAS DEPARTMENT OF TRANSPORTATION'S

2016 Annual Report

This appendix contains additional transportation information including:

- Financial Compliance
- Project Selection Criteria
- Project list detailing projects currently scheduled for improvement, projects completed in FY 2015 and projects under construction. Also list of aviation, rail and public transit projects.
- Transportation Revolving Fund
- Modal Information
- Federal Fund Exchange Program

Section A

Financial Compliance

Each year, the Department provides financial information to the Governor and Legislature. This information includes both a summary of financial information and a statement of assurance that a Comprehensive Annual Financial Report (CAFR) of all funds for the preceding year has been prepared. The financial report must include a report by independent public accountants attesting that the financial statements present fairly the financial position of the Department in conformity with generally accepted accounting principles (GAAP).

The Department has prepared a CAFR for Fiscal Year (FY) 2015. A report of the independent public accountants,

CliftonLarsonAllen, LLP, is included in the CAFR after audit completion. Also included in the CAFR is a certificate of achievement awarded to the Department for excellence in financial reporting for the FY 2014 CAFR. This award marks the 27th consecutive year that the Department has received the award.

The complete CAFR is available by contacting the Department's Office of Public Affairs at 785-296-3585 (Voice)/(TTY). The FY 2015 CAFR will also be available under the KDOT Financial Disclosures section of the Department's website at <http://www.ksdot.org/bureaus/burFiscal/default.asp>.

FY 2015 FINANCIAL INFORMATION

The following schedule is a summary of revenues and expenditures for all funds for FY 2015. All amounts are in thousands.

<u>REVENUES</u>	<u>2015</u>	<u>Percent of Total</u>
Motor Fuel Taxes	\$ 434,662	28 %
Vehicle Registrations and Permits	218,788	14
Intergovernmental	399,932	25
Sales and Use Taxes	512,360	32
Investment Earnings	3,378	0
Other	7,955	1
Transfers from Other State Funds	2,196	0
Total revenues	\$ 1,579,271	100 %

<u>EXPENDITURES</u>	<u>2015</u>	<u>Percent of Total</u>
Current Operating		
Maintenance	\$ 133,608	7 %
Preservation	432,941	23
Modernization	19,528	1
Expansion and enhancement	344,574	18
Communications system	5,519	0
Local Support	299,250	16
Rail, Air and Public Trans.	16,556	1
Management	53,465	3
Debt Service		
Principal	90,065	5
Interest and fees	74,727	4
Transfers to Other		
State Funds	430,519	22
Total expenditures	\$ 1,900,752	100 %
<u>OTHER SOURCES (uses)</u>	<u>511,504</u>	<u>100</u>
Total other	511,504	100
Excess (Deficiency) of Revenues and Other Sources Over Expenditures	\$ 190,023	100 %

Project Selection Criteria

In May 2010, the Kansas Legislature passed the transportation program, Transportation Works for Kansas (T-WORKS) that covers a 10- year period from FY 2011 through FY 2020. Under the direction of T-WORKS, KDOT developed a more strategic approach to highway project selection. In the previous program, the Comprehensive Transportation Program (CTP), project selection was based solely on engineering factors. However, in T-WORKS, while engineering factors are still used to select projects, they have been augmented with economic impact evaluation and/or local input whenever practical. Additionally, to achieve greater programming flexibility, rather than making all project selections at the start of the program as was done in past transportation programs, under T-WORKS many projects are being selected on a rolling 2- year basis. Extending project selections over the life of T-WORKS has increased KDOT's ability to respond to changes in roadway conditions and economic opportunities as they arise. By implementing these changes, the project selection process provides greater stakeholder input, more flexibility in projects selected and an increased ability to respond to the prevailing economic conditions.

Under T-WORKS construction projects are categorized into four core programs: Preservation, Modernization, Expansion and Local Construction. The four core programs group construction projects with similar work types and scopes together. Projects within each of these major programs are further grouped together based upon similar funding sources or project-types into more specific groups or subcategories. In the new project selection process, each of the core programs have evaluation criteria that are used for making project selections.

For the Preservation program, engineering factors are an effective evaluation method for project selection and remain the sole factor used for selecting projects in this program. However, in the Modernization and Expansion programs, engineering factors are augmented with other factors. In the Modernization program, project selection combines historically strong engineering-based formu-

las with regional priorities and in the Expansion program, project selections combine engineering factors with regional priorities and economic impacts. In each of the programs, proposed projects are scored and ranked based upon how well the proposed projects address the relevant evaluation criteria. Then, selections are made based upon the combined information. The addition of these new factors help ensure that a project is not only a sound engineering project but is also a project that aligns with the goals and priorities of a region and in the case of expansion projects provides economic benefits. Project selection for the fourth core program, Local Construction, remains unchanged and is determined at the local level by local entities throughout the state with the coordination of KDOT's Bureau of Local Projects.

Engineering factors for the preservation, modernization and expansion programs are evaluated using the engineering based formulas KDOT already has established. Regional priorities are determined through local-consult meetings held throughout the state on a biennial basis. Under T-WORKS, KDOT has conducted local consult meetings in the fall of 2010, 2012 and 2014. The next consult meetings are anticipated to occur in late 2016. Through these meetings and through the continued interaction between the area and district engineers with local entities, KDOT maintains a dialogue with stakeholders throughout the state concerning regional focus and priorities. The third factor, economic impact is assessed by the agency through the computer modeling package-Transportation Economic Development Impact System (TREDIS). TREDIS estimates the potential increases in jobs, income and economic output for a region resulting from a specific transportation improvement.

The chart below illustrates the selection criteria applied to T-WORKS projects in each of the four core programs and the weight given to each criterion.

The Preservation program protects the public's investment in its highway system by maintaining the "as built" condition of roads and bridges. Projects in this group range from roadway surfacing rehabilitation and bridge repairs to pavement and bridge replacement.

T-WORKS Project Selection Criteria

Program	Engineering Factors	Regional Priorities	Economic Impact	Other
Preservation	100%			
Modernization	80%	20%		
Expansion	50%	25%	25%	
Local Construction				100%

The engineering factors used when selecting preservation projects relate to the pavement and bridge conditions, like remaining pavement life, rutting, and cracking for roads and joint or bridge deck condition and/or load ratings for bridges. Roads and bridges are evaluated on an annual basis and projects are selected each year based upon this review. Additionally, within the preservation program, are smaller scale set-aside projects that address such issues as signing, pavement markings and railroad crossing surfaces. These set-aside projects are so named because the funds to perform the work is “set aside” or reserved specifically for the type of work designated by the set-aside category. The set-aside group of projects is selected on an annual basis like the other preservation projects. Since projects in the Preservation program are selected annually and the work involved rarely requires more than one season to complete, the majority of the preservation projects listed in this report is for work to be performed in fiscal year 2016. Selecting and programming projects in the Preservation program on an annual basis allows KDOT to maintain flexibility and responsiveness in their project selection process during T-WORKS.

The second core program, Modernization, focuses on improvements to the existing system. Projects under this program are designed to enhance safety and/or improve roadways by adding shoulders, flattening hills, straightening curves and upgrading in-

tersections on already existing roadways. In May 2011, the final selection of the major modernization projects to be completed under T-WORKS was made. These projects were then jointly announced in late May and June 2011 by the Governor and Secretary of Transportation. With the majority of the modernization program already selected, the projects to be undertaken during T-WORKS appear in this report. The scope of the “major” or more complex modernization projects require that selections be made early in the transportation program to ensure that there is sufficient time for the design and construction of the project during the T-WORKS program period.

Also included within the modernization program are the practical improvement projects which are developed out of the preservation program annual review of roads and bridges and the smaller scale set aside projects. Projects within the practical improvement umbrella are hybrids with elements of both the preservation and the modernization programs. However, the projects have greater complexity and scope than preservation projects making them a better fit for the modernization program. In contrast to other modernization projects, practical improvement projects are not selected in advance but rather are selected on a need basis as determined from the annual review. Project scope pertaining to shoulder improvement is an example of the type of work that is a good candidate for the practical improvement approach. By employing the practical improvement approach, a project may be completed in the most cost-efficient manner feasible. The implementation of this approach enables KDOT to stretch construction dollars and provide the greatest benefit possible for the dollars spent. Projects in the four subcategories of the modernization program that are in the set aside program address issues like corridor development and smaller safety improvements like adding turn lanes and lighting. The set-aside projects like the practical improvement projects are selected on an annual basis. While most of the modernization funds have been programmed and projects have been selected, a small portion of funding has been reserved to fund the practical

improvement projects and set aside projects as they are identified as T-WORKS progresses. In this way, flexibility in scheduling is balanced with the need for early selection of major modernization projects.

The Expansion program, the third principal group under T-WORKS, is intended for projects that expand and enhance the transportation system. Projects in this program concentrate on improving access by adding new lanes or interchanges, reducing commute time and improving air quality by relieving congestion and enhancing economic development in a region by selecting projects with high economic impact. The expansion program, with the exception of the economic development (EDP) and intelligent transportation systems (ITS) set aside, was selected in early FY 2011 and announced by the Governor and Secretary of Transportation in May and June 2011. The expansion projects selected to be completed under T-WORKS appear in this report- including all economic development and intelligent transportation systems projects selected to date. Due to the complex nature of the Expansion program of projects, early selection is crucial to ensure sufficient planning, design and construction time during the T-WORKS program period.

To maintain some flexibility in scheduling in the expansion program, the economic development and intelligent transportation systems projects have been partially selected. The remaining economic development projects will be selected on an ongoing basis throughout T-WORKS as viable projects surface and the intelligent transportation systems projects are selected on an annual basis. In this way, the agency maintains some flexibility to respond to new opportunities as they emerge throughout the remainder of the T-WORKS program.

The fourth program, Local Construction, focuses on improvements to city or county roads. The work encompassed by this program is varied in nature ranging from safety oriented, to maintenance of existing roadway, to small-scale expansion type projects. Regardless of the project focus, the common denominator for all projects is that the work is always on a city or county road. Many

of the subcategories within the Local Construction program like the K1R-City Connecting Link Resurfacing (KLINK) program and TEX- Transportation Enhancement program to name only two are partnership programs in which KDOT or the federal government partner with local entities to share the costs and enable local dollars to stretch further. To generate candidate projects, many partnership programs employ a solicitation process in which prospective projects are solicited through an application. The pool of project applications is prioritized based upon program specific criteria. Then, projects are selected in order of priority and programmed until the available funds are expended. The schedule for project solicitation varies but most of the partnership programs solicit projects on an annual basis. In other subcategories within the local construction program, the locals are solely responsible for project selection and development. To assist local entities in their selection process KDOT makes available bridge inspection data, traffic accident data and traffic count data among other resources. In KDOT, the Bureau of Local Projects is the primary point of contact for local construction. Detailed information concerning the local construction program and specifically the partnership programs is located on the T-WORKS website, the link is provided below.

For an in depth look at the entire T-WORKS program including those projects in the core programs, KDOT has established a website that provides information about all projects selected. This website is a continued effort on KDOT's part to increase transparency and gain greater stakeholder input. To accomplish this goal, the website is not only a source of more information but is interactive with sites throughout that provide opportunities to submit questions, opportunities for participation in discussions and opportunities for comment submission. The T-WORKS website is located at the following link <http://kdotapp.ksdot.org/TWorks/> .

Project Listings

The project listings can be found starting on page B-1.

Transportation Revolving Fund

The Transportation Revolving Fund was a statewide revolving loan fund that provided loans to local units of government for financing road and bridge improvements on and off the State Highway System. Since August 2004, the fund provided 119 executed loans totaling \$141.7 million to 58 cities and counties. KDOT is currently reviewing the status of the TRF program.

Modal Information

Public Transportation

Public transportation in Kansas is supported by one state program and five Federal Transit Administration (FTA) funding programs. These funding programs, which are augmented by local match, provide the funding for the 83 general public transit service providers and the 59 transit providers that service elderly persons and persons with disabilities throughout the state. Without these programs, many citizens would have no access to public transportation.

The FTA 49 U.S.C. 5311/MAP-21 Section 20010 program provides capital, planning, and operating assistance to states to support rural and small urban (under 50,000 population) transportation projects that serve the general public. For Federal Fiscal Year 2014, the 5311 program for the state of Kansas was funded in the amount of \$10,948,814.

FTA 49 U.S.C. 5310/MAP-21 Section 20009

This program is intended to enhance mobility for seniors and persons with disabilities by providing funds for programs to serve the special needs of transit-dependent populations beyond traditional public transportation services and Americans with Disabilities Act (ADA) complementary paratransit services. Urbanized areas and nonurban areas with populations under 200,000 are eligible for 5310 funds. For Federal Fiscal Year 2014, the 5310 program for the state of Kansas was funded in the amount of \$2,110,256.

Prior to MAP-21, FTA 49 U.S.C. 5316 provided federal funds to local governmental agencies and nonprofit entities for capital and operating expenses of equipment, facilities, and associated capital maintenance items related to providing access to jobs. In Federal Fiscal

Year 2013, under MAP-21 the 5316 program for the state of Kansas was rolled into the FTA 49 U.S.C. 5311 program.

Prior to MAP-21, FTA 49 U.S.C. 5317 provided federal funds to encourage services and facility improvements to address the transportation needs of persons with disabilities that go beyond those required by the Americans with Disabilities Act. Funding was used for associated capital and operating cost. For Federal Fiscal Year 2013, under MAP-21 the 5317 program for the state of Kansas was rolled into the FTA 49 U.S.C. 5311 program.

FTA 49 U.S.C. 5304 provides funding to support cooperative, continuous and comprehensive planning for making transportation investment decisions statewide and in nonmetropolitan areas. For Federal Fiscal Year 2013 the state of Kansas was funded in the amount of \$140,509.00.

FTA 49 U.S.C. 5339 provides funding to replace, rehabilitate and purchase buses and related equipment and to construct bus-related facilities. For Federal Fiscal Year 2014, the state of Kansas was funded in the amount of \$3,037,123.00

Funding for the state program is available from the Coordinated Public Transportation Assistance Fund. The State Highway Fund provides \$11 million dollars annually for needed transportation services in areas of the state lacking public transit services and to expand, improve and enhance existing services.

Rail Service Improvement Fund

Many areas of the state no longer have service from Class I railroads. Short line railroads provide rail service to such areas, provide an alternative to trucks for freight (primarily grain) shippers, and keep rural areas of the state connected to the national rail network as well as national and international markets for Kansas grains and products. This alternative provides competition and helps keep shipping rates down. It also reduces the number of trucks that would otherwise be on Kansas roads and highways. This in turn avoids increased maintenance and rehabilitation costs for those roads.

The Rail Service Improvement Fund is administered by KDOT's freight and rail unit. The fund makes combination grants and loans

available to short line railroads, port authorities operating in Kansas and shippers and local units of government. The low-interest, long-term (10-year) loans and grants are used primarily for track rehabilitation, capacity improvement and economic development projects. Funds may also be used for financing and acquisition activities and the purchase of rolling stock. The fund receives \$5 million annually.

Kansas Airport Improvement Program

When time is of the essence, no other means of travel can fulfill time-sensitive requirements the way air transportation does. Airports serve an important role in the state transportation system. The foremost role is to support economic activity generated by companies that rely on airports in their daily business. According to the 2010 Kansas Aviation Economic Impact Study, aviation contributes over \$20 million to the Kansas economy each year, the highest per capita impact of any state.

Also important are medical services, both fly-in by professionals as well as emergency evacuations. In addition, agricultural applications, charters, a link to the national air transportation system, private air travel, and many other opportunities are available by virtue of our Kansas system of public-use airports.

The goals of the Kansas Airport Improvement Program (KAIP) include:

- Maintain the system’s runway condition rating of “very good”;
- Minimize surface travel time to air ambulance pick-up locations;
- Improve safety, and;
- Enhance airport and community economic development appeal.

The program is open to public-use airports in Kansas as defined in K.S.A. 75-5061. Projects under this program are solicited annually to preserve or modernize facilities, to design or plan continued development and to improve or add equipment. A key element of the program is a local matching requirement of between 5 and 50 percent, which is determined by project category. In FY 2015 the program was increased from \$3 million to \$5 million per year as part of the T-Works Transportation Program. This \$5 million per year in state funds, combined with local matching funds, results in \$5.5 to \$6 million in

airport improvements per year on average.

Since its inception in FY 2000, the program has supported 491 projects at 116 public-use airports totalling nearly \$100 million in airport improvements to the state.

Federal Fund Exchange Program

The federal fund exchange program is a voluntary program that allows a local public agency (LPA) to trade all or a portion of its federal funding allocation in a specific federal fiscal year with KDOT in exchange for state transportation dollars or with another LPA in exchange for their local funds.

Under this program the LPA may develop projects following local procedures, criteria, and standards. All work performed shall be consistent with the Kansas Statutes, applicable regulations, and

normal engineering practices for the work being done. Any work performed on the state highway or city connecting link will require coordination with the local KDOT Area Office.

Only LPAs that are eligible to receive a federal funding allocation may participate in the federal fund exchange program. Eligible LPAs include all counties in the state and cities with populations greater than 5,000 that are not located in a Transportation Management Area (TMA). Currently the only TMAs in Kansas are the Mid America Regional Council (MARC – Kansas City Region) and the Wichita Area Metropolitan Planning Organization (WAMPO).

Participation in the program is optional. An eligible LPA may choose to exchange its federal funds or it may use the funds to develop a federal aid project following the established procedures.

In general, KDOT will annually determine the amount of state funds available for exchange at the time the federal funding is confirmed for a federal fiscal year (FFY). KDOT may conduct more frequent reviews of available funding when necessary as a result of funding or budgetary considerations. Around the beginning of each new FFY, KDOT’s Bureau of Local Projects will notify the LPAs in writing of the amount they are eligible to receive for that FFY.

For more details on this program, see KDOT’s website at www.ksdot.org/burlocalproj/.

PROJECT LISTINGS

Sections B, C, D, E

This section contains the separate project lists.

The remaining projects currently scheduled for improvement in T-Works, projects completed in FY 2015 and projects under construction. All lists are organized by county and route. Each project includes a description, project length, construction cost or estimated construction cost and work type.

K.S.A. Supp. 68-2315, as amended, requires information that includes construction work completed, construction work in progress and planned projects. A detailed explanation of the methods or criteria employed in the selection of projects is also required and may be found in this appendix in section A.

In addition to state highway construction project lists are aviation, rail, and public transit project listings.

NOTE: This section, as well as previous Annual Reports, is available on KDOT's Internet site at www.ksdot.org/publications.asp.

The project lists are:

- *Remaining projects currently scheduled for improvement in T-WORKS, pages B-1 to B-21.*
 - *Projects completed in FY 2015, pages C-1 to -C-40.*
 - *Projects under construction, pages D-1 to D-25.*
 - *Aviation, rail and public transit projects, pages E-1 to E-4.*
-

PROGRAM CATEGORIES

The following is a breakdown of the Program Categories that are shown in the Project Listing.

LC- Local Construction

HAZ- Safety Projects (HSIP, off-system)
HES- Safety Projects (HSIP, on-system)
K1R- KLINK Resurfacing
K3R- Geometric Improvements for KLINKs
LBT-Local Bridge Transfer Program
LOC- Local Construction (Local Administered & Let)
RES- Local Construction (KDOT Administered & Let)
RRX- Railroad Crossing Protection (HSIP, on-system)
RXR- Railroad Crossing Protection (HSIP, off-system)
SRT- Safe Routes To Schools (Federal)
TEX- Transportation Enhancement Program

MM- Modernization--Safety & Shoulder Improvements

IRS- Resurfacing w/Improvements (Practical Design)
COR- Corridor Management
GFU- Guard Fence Upgrades (No Longer Used)
GSI- General Safety Improvement Projects
IRI- Interstate Roadway Geometric Improvements
KCC- KCC Railroad Crossing Projects
LTG- Highway Lighting
MPR- Miscellaneous
OVC- Oil Overcharge (No Longer Used)
RIM- Non-Interstate Geometric Improvements
SAF- Safety Projects (State)
SBW- Scenic Byway

SE- Expansion/Enhancement--Adding Something New

AAR- Advanced Acquisition of ROW
EDP- Economic Development
IRC- Interstate Capacity Impr (old IRI split to Exp/Enh)

SE- Expansion/Enhancement--Adding Something New

ITS- Intelligent Transportation Systems (ITS)
RIC- Non-Interstate Capacity Impr (old RIM split to Exp/Enh)
RSL- Local Partnership Railroad Grade Separations
RSP- New Railroad Grade Separations (State)
SEB- System Enh. – Bypasses (retired)
SEC- System Enh. – Corridors (retired)
SEI- System Enh. - Interchanges/Separations (retired)
SEW- System Enh. - Wichita Railroad Crossings (retired)

SM- Preservation--Taking Care of What We Have

IRR- Non-Interstate Resurfacing (PMS 1R)
BCR- Culvert Repair
BSP- Bridge Painting
BSR- Bridge Repair
CMN- Contract Maintenance (PMS)
EMR- Emergency Repair
IRP- Interstate Basic Impr (old RIM split to Preservation)
ISR- Interstate Resurfacing (PMS)
NHP- Miscellaneous for Preservation
PBR- Bridge Replacement/Rehabilitation
PCR- Culvert (to Bridge) Rehabilitation
PDR- Bridge Redeck
PMR- Pavement Marking
RIP- Non-Interstate Basic Impr (old RIM split to Preserv)
RRS- Railroad Crossing Surfacing
SLR- Signing & Lighting Repair and Replacement
SOS- Highway Signing
SRR- State Route Removal Program

REMAINING PROJECTS SCHEDULED FOR IMPROVEMENT IN (remaining FY 2016 - 2020)

County	Route	Location Description	Length (Miles)	Type of Work	Est FY Const. Cost (1,000's)	Prog Cat & Subcat	Fiscal Year
Allen		CITY OF IOLA		Preliminary Engineering		LC-SRT	2016
Allen		1.5 MILES NORTH AND 2.7 MILES EAST OF GENEVA OVER MARTIN CREEK	0.2	Bridge Replacement	218	LC-LBT	2017

Washington	Washington	Repair Airfield Pavements	65,700.00	59,130	6,570

Rail Service Improvement Fund

Many areas of the state no longer have service from Class I railroads. Short line railroads provide rail service to such areas, provide an alternative to trucks for freight (primarily grain) shippers, and keep rural areas of the state connected to the national rail network as well as national and international markets for Kansas grains and products. This alternative provides competition and helps keep shipping rates down. It also reduces the number of trucks that would otherwise be on Kansas roads and highways. This in turn avoids increased maintenance and rehabilitation costs for those roads.

The Rail Service Improvement Fund is administered by KDOT's freight and rail unit. The fund makes available to short line railroads and port authorities operating in Kansas, and shippers and local units of government in coordination with the serving railroad, low-interest, long-term (ten-year) loans and grants to be used primarily for track rehabilitation, capacity improvement and economic development projects. Funds may also be used for financing and acquisition activities and the purchase of rolling stock.

Project Number	Rail Line Segment	Grant Amount	Loan Amount	Project Description
28 RF-0043-01	Garden City Western	107,865.63	143,820.84	Replacement of crossties, ballast and OTM; surfacing of three miles on the West Line Subdivision in Finney County
106 RF-0042-01	V&S Railway	957,522.00	1,276,696.00	Replacement of crosssites, ballast and OTM; surfacing of 21 miles between Attica and Medicine Lodge.
59 RF-0046-01	Kansas and Oklahoma	679,374.60	905,832.80	Replacement of rail, ties and OTM. Ballast and surfacing in McPherson County
28 RF-0045-01	Garden City Western	111,093.90	148,125.20	Removal and replacement/upgrade of six switches at Garden City
73 RF-0044-01	Kansas and Oklahoma	131,721.34	175,628.46	Replacement of ties; installation of 1,240 feet of new track and OTM; additional ballast and surfacing in Pawnee County

State/Federal Public Transit Programs - Contracts

FY 2015 Coordinated Transit District (CTD) Operating

Coordinated Transit District (CTD) Operating	Counties Served	Total Operating Costs	Local Share	State Share	Federal Share	Total Vehicle Costs	Local Share	State Share	Federal Share
Urban Corridor Coordinated Transit Council (CTD 1)	Douglas, Johnson, Leavenworth, Wyandotte	\$407,569.75	\$123,139.78	\$116,624.00	\$167,806.00	\$314,201.00	\$62,840.20	\$0.00	\$251,360.80
